PROFESSIONAL SUMMARY

Dynamic Frontend Developer with a proven track record at Skinstric AI, specializing in React and performance optimization. Successfully built scalable applications and real-time AI platforms, enhancing feature delivery speed. Adept at API integration and collaborating with crossfunctional teams, ensuring alignment with business goals while fostering a user-centric approach.

CORE SKILLS

Node.js, React, TypeScript, JavaScript (ES6+), Tailwind CSS, API Integration, Vite, Netlify, Chakra UI, Redux, Zustand, Jira, EpiServer, Agile, GitHub, Vercel, CI/CD, Firebase, Supabase, REST APIs, Responsive Design principles, GSAP, Lottie, Web Performance, React Testing Library, Figma, VS Code, Ansible, VCS Volume Manager, Shell Scripting & Cron, Automation, Apache Tomcat, Server Hardening & Patch, RHEL, CentOS

SOFT SKILLS

Strong ownership mindset, clear communicator, detail-oriented, and effective in Agile, remote team environments.

PROFESSIONAL EXPERIENCE

Skinstric AI — Frontend Engineer (Full-Stack Responsibilities) **Remote | May 2025 – Present**

- Built and deployed a scalable web application using Next.js and React, integrating frontend UI and backend APIs, improving feature delivery speed;
-Developed a real-time AI platform using OpenAI APIs, enabling automated image analysis and reducing manual processing time;
- Optimized performance with Next.js Server Components, reducing load time to < 2 seconds and improving user experience;
- Built interactive features and dashboards, handling API integration, dynamic JSON data, loading/error states, and user events;
- Delivered production-ready applications using Vite, Git, and deployments on Vercel / Netlify Developed a real-time AI platform using OpenAI APIs, enabling automated image analysis and reducing manual processing time ;
- Collaborated in SaaS environments with cross-functional product teams, aligning engineering solutions with business and user needs

Frontend Simplified — Frontend Developer **Remote | November 2023– May 2025**

- Developed responsive React.js frontend components for NFT display platform utilizing Firebase Authentication and Firestore database, serving 1000+ digital assets;
- Integrated RESTful APIs using Axios to retrieve NFT metadata and digital assets, ensuring 95% request success rate and load times under 2 seconds;
- Implemented user authentication system using Firebase Authentication, resulting in 500+ registered users and secure data management;
- Built and maintained 15+ reusable React components with JavaScript ES6+, Redux for state management, and Material-UI for cohesive styling;
-Deployed Firebase Cloud Functions to handle backend operations, reducing server response time by 30% for NFT metadata retrieval;
- Created mobile-responsive layouts using CSS Flexbox and Grid, ensuring consistent display across desktop, tablet, and mobile devices with 98% compatibility.
-Collaborated with a 3-person development team using Git version control and Agile methodologies, completing 40+ JIRA tickets in 3-month development cycle.Goal: Build strong React fundamentals, debugging skills, and remote Agile teamwork experience.

ABC Corporate Business Solution — Linux System Administrator **November 2020 – February 2023**

- Ensured uptime and reliability by managing Linux servers to maintain 99.9% server uptime.
- Improved efficiency via automation and monitoring tools to reduce manual tasks by ~50%.;
- Strengthened security and performance through systematic updates and troubleshooting, decreasing system errors by 30%.
-Created documentation for processes to enhance team operations, improving onboarding speed for new team members by 25%.

PROJECTS
